

REVIEWER COMMENTS
VIET-POL-2021
(First Assessment)

Article title: "Influence of single phase voltage loss and load carrying mode on mine drainage pump motor in Vietnam"
Please use this guide to assist you in formulating your comments on the review form below:
(Please, double-click on one square for your selection)

1. Initial points to be considered:

- Does the subject fall within the scope of the conference? Yes No
- Is this a novel and original contribution? Yes No
- Are interpretations and conclusions sound, justified by the data and consistent with the objectives? Yes No
- Is the material too clinical, too specializes or too preliminary for our readership? Yes No

If your answers (s) to any of the above points suggest that the paper is not suitable for the conference, please give clear argument for rejection on the review form:

2. If the paper is appropriate for review, then please consider the following:

- Does the title clearly reflect the contents? Yes No
Comment: The title is clear and good.
- Is the abstract sufficiently informative, suitable to appear on the conference? Yes No
Comment: abstract suitable to appear on the conference
- Are keywords appropriate? Yes No
Comment: Suggest the author to add keywords
- Is the statement of the article adequate and appropriate in view of the subject matter? Yes No
Comment:
- Is the description of materials and methods sufficiently informative to allow replication of the experiment? Yes No
Comment:

- Are the statistical methods used correct and adequate? Yes No
Comment:
- Are the results clearly presented? Yes No
Comment: Formula 2, 6 and 7 clearly unit.
- Is the organization of the article satisfactory? Yes No
Comment:
- Does the content justify the length? Yes No
Comment:
- Are the figures, photos and table all necessary, complete and clearly presented? Yes No
Comment: In Figure 7, figure 9, figure 10, 11, the lines of different experiments need to be plotted differently
- Are the references adequate? Yes No
Comment:
- Is the English correct and understandable to a multidisciplinary and multinational readership? Yes No
- Missing space in some places.
Please check the English within the paper, some of sentences not clear and should be fixed:
- From the results shown in table 2 on Fig 6 and Fig 7 it can be seen that the parameters of the motor after running the simulation model have values consistent with Table 1.
- Table 3. Results of motor performance parameters in case of single phase voltage loss taking into account the load carrying factor and the effect of harmonics.

3. Recommendation to the Editor:

- Acceptance with no revision
- Acceptance with minor revision
- Acceptance with major revision
- Rejection
