#113 (1571033972): *Design and Analysis of an Active CMOS Low Pass Filter for IoT-RFID Devices*

Hide details

Authors Mohammad Arif Sobhan Bhuiyan (Xiamen University Malaysia, Malaysia)

Paper title *Design and Analysis of an Active CMOS Low Pass Filter for IoT-RFID Devices*

Conference and track **The 3rd International Conference on Intelligence of Things 2024** - *Internet of Things Applications (round 2)*

Abstract Radio frequency identification (RFID) technology is adopted to automate data collecting while...

Similarity On Jun 1, docoloc computed a similarity score of 3 for the review manuscript.

Personal notes

Roles You are a TPC member for this conference.
You are writing a review for this paper.
You have completed the regular reviews for this paper.

Status Active (has manuscript)

Review manuscript

Regular review | Discussion
